## 3 Evaluation System

### Evaluation System of the LC study program

The Learning center is based on an ongoing and comprehensive evaluation system, allowing the student to assess his/her knowledge in the different study topics.

The student will find the following types of tests:

#### a) Self Assessment Test

This test is **voluntary** (but recommended) and the qualification it generates is for orientation purposes only. It consists in an online test, made of several types of questions (multi-choice, yes/no, multi-area, fill the blank, etc.). The questions are drawn from the Units's content and also from the bibliography and reference material. This automatic test aims to **review the studied concepts** and prepare the student for the Unit Exam.

This module has no limit of trials and the student can review the answers and explanations at the end of each trial. Each time the student starts the test anew, a random choice of questions will be pooled out of the question bank. The question bank for each unit contains around 250 questions, and the entire pool **over 1000 questions**.

# Learning Center

## b) Unit Exam

This is a **mandatory** test done online which aims to check the student's correct understanding of the concepts explained in the corresponding learning unit. The student has **three trials** to reach the required minimum passing score. This test is made of **40 to 50 questions**. It can be stopped and resumed at any time, removing any time pressure on the student. At each trial, the system will present a random choice of questions to the student. The best qualification the user gets will be taken as reference for the Certification.

## c) Practical Test

This is a practical exercise the student has to execute in order to assess the **correct application of the acquired knowledge**. This exercise has to be sent to the tutor by email for its further revision and rating. It is **mandatory** and gives access to the Certificate, together with the Unit Exam.

## Norms on plagiarism and coping evaluation tests

The execution of the tests is of **individual nature**, and should therefore be done by the student alone. Should the student have some difficulty in answering the test, the tutor will be available for consultation during the online live sessions.

In this sense, FXstreet.com's education team will not accept Practical Tests copied from other students, or answers copied directly from the LC online contents.

This behavior will be considered illegitimate swindle and will not be accepted by FXstreet.com, leaving the test as not passed.
